

**Radiology  
Consultants**  
ASSOCIATED

## **THE DIFFERENCE IS CLEAR**

A progressive partnership of radiology professionals, Radiology Consultants Associated is a leading provider of specialized diagnostic imaging and exceptional medical care in western Canada.

RCA's history dates back to 1911 when our founder – Dr. William McGuffin – established himself as Calgary's first radiologist. Now owned and operated by 40 of Canada's leading radiologists, RCA currently operates 12 facilities in Calgary, one in Lloydminster and one in Regina, and we are growing bigger – and better – all the time.

RCA provides all modalities of specialized imaging using state-of-the-art CR and DR in a PACS environment. Our patients receive caring, attentive service and avoid the wait times so many people associate with healthcare today.

RCA won Calgary Inc's 'Best Places to Work' Survey in 2008; and in the Queen's/Hewitt 'Best Small & Medium Employers in Canada' survey, we placed 26th in 2009 and a very impressive 5th in 2010.

**RCA's mission is to provide the highest quality of diagnostic services for our clients, in partnership with hospitals and community practitioners.**
